

Pitch Tendency Tracker

Flute

Name: _____

Directions:

To complete this chart, properly warm up on your instrument, and then tune with a tuner. Then, find a partner, and complete the following steps:

- Write the date in one of the spaces below. The date number will correspond to the space you write the pitch tendency in for each note.
- Sustain the written note on your instrument several times while your partner watches the tuner.
 - If the note is in tune or less than five cents sharp or flat, mark it with a check mark.
 - If the note is more than five cents sharp, mark the number of cents sharp with a plus sign. (Ex. +18)
 - If the note is more than five cents flat, mark the number of cents flat with a minus sign. (Ex. -18)
- Repeat the previous step for all notes on your instrument.
- Complete this process on three separate dates.
- When you have completed the tracker, go back and look for the notes that were the most out of tune, and answer the question at the bottom of the tracker!
